

After we looked at those big buildings we watched another big building. Of course there have been much more ice sculptures. But I'm telling only of the big and interesting one. Around 16 o'clock it was almost dark outside. Now they turned on the lights and everything looked different than before. In every ice sculpture have been lights inside. So they looked in different colours. Also there have been other sights. I had a lot of fun to slight like a little child. But as I told I wear the wrong cloth for this fun. We stayed a very long time outside, so we decided to go somewhere to eat. This building was made of glass and it was warm inside. We ate two tasteful burgers with a hot chocolate. Afterwards we went out again and started our tour from the beginning. The great wall looked now totally different.
